

Credit Union Accounting and Management System-ii (CAMS-ii™)

Version 5.4.9.4 Update Notice

This update notice describes new features, updates, changes, and anomalies for this CAMS-ii Update.

Last updated on January 26, 2019 at 21:45 EST.

This is a summary of the items included in this CAMS-ii Update.

- In Control-Master parameters (Back Office > Standard > Parameters), added **Min** and **Max** text boxes to the **Teller Password Length** to control the minimum/maximum range for the number of required characters for the Teller ID password.
- In a recent update, we added a *Certified Check* option button to Multiple Transactions > Check Out (The following graphic from the *CAMS-ii version 5.4.9.3 Update Notice* illustrates what was added in the previous release.)

The screenshot shows the 'Check Out' interface. At the top right is a green 'Check Out' button. Below it are two sections: 'Checks Issued to Member: 0' and 'Checks Issued to 3rd Party: 0'. The 'Checks Issued to Member: 0' section contains a 'Check Amount' field with a '1.' prefix, and a 'Payee Option' section with four radio buttons: 'Member only on check' (selected), 'Member not on check', 'Member AND', and 'Member OR'. The 'Checks Issued to 3rd Party: 0' section contains an 'Address Option' section with three radio buttons: 'Member's address on check' (selected), 'Other address on check', and 'No address on check', and a 'Payee and Address' field. A green box highlights the 'Certified Check' radio button in the 'Payee Option' section, with a green arrow pointing to it from the text 'Earlier Release'.

This option was enabled by default. This update adds two new CAMS-ii System properties to correct this. If you want to change the settings to change the wording on the official check, or disable the Cashier's Check option button, please submit a ticket to the CAMS-ii Ticket Tracker.

IMPORTANT: If your CAMS-ii server still uses the *old* pre-printed form (where the check appears in the middle of the page), these options are not available to you.

The properties are—

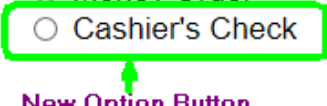

Property	Function	Default *
forms_check_cashiers_check_text	Controls the text for the top of the official check	Cashier's Check
multitx_checkPrint_Cashier	Controls whether Cashier's Check option button appears on MultiTX Check Out	Y= Option button appears (Default) N= Option button does not appear

***Note:** Initially, your CAMS-ii server is set to the default settings.

The new Multiple Transactions > Check Out screen appears as illustrated below using the default setting the `multitx_checkPrint_Cashier` CAMS-ii System Property.

Check Out

Check Amount	Payee Option	Address Option	Payee
1. <input type="text"/>	<input type="radio"/> Member only on check	<input type="radio"/> Member's address on check	<input type="text"/>
<input checked="" type="radio"/> Official Check	<input checked="" type="radio"/> Member not on check	<input checked="" type="radio"/> Other address on check	<input type="text"/>
<input type="radio"/> Money Order	<input type="radio"/> Member <i>AND</i>	<input type="radio"/> No address on check	<input type="text"/>
<input type="radio"/> Cashier's Check	<input type="radio"/> Member <i>OR</i>		<input type="text"/>

New Option Button
