

Credit Union Accounting and Management System-ii (CAMS-ii™)

Version 5.4.9.3 Update Notice

This update notice describes new features, updates, changes, and anomalies for this CAMS-ii Update.

Last updated on January 18, 2019 at 17:35 EST.

This is a summary of the items included in this CAMS-ii Update.

- Added a **Certified Check** option button to the Multiple Transactions > Check Out screen.

NOTE: This applies only if your system is configured with the new check format — not pre-printed checks — and configured to print money orders. Contact the CBS Support Center via the CTT for help with configuring the Certified Checks option.

- HMDA -- Because of changes in the in FFIEC report file format requirements, the CAMS-ii Data Miner export solution for the HMDA extract file no longer provides the data in the required format.

With this update, CBS Support retrieves the HMDA extract file, so you must submit a request to the CAMS-ii Ticket Tracker, with HMDA Extract File in the subject field. CBS Support will contact you when you are able to retrieve the HMDA extract file for you to export to the appropriate agency.

NOTE: This is a one-time situation. In a later release, the HMDA extract file creation will be integrated into CAMS-ii.

- Added Menu Security nodes (Back Office > Standard > Parameters > Teller ID Maintenance > Menu Security > Exceptions Processing) to control access to ATM Exceptions and Vantiv WS Exceptions to allow for separate handling card exceptions between staff members.

- Added a column to the CPI extract file that adds payment frequency. This column is populated by one of the following characters to indicate the payment frequency for each loan:
 - B = Bi-Weekly
 - W = Weekly
 - S = Semi-Monthly
 - A = Annually
 - E = Semi-Annually
 - N = Semi-Monthly
 - O = Annually
 - Q = Quarterly
- All unidentified ACH Company IDs now go directly to Company ID Maintenance to be processed and assigned an ACH type.
- In the Content Management System (Back Office > Standard > Utilities > Scanned Document Utility) changed the Filter Categories to a Set Label Filters pop-up.

Bugs

The following describes the bugs we have fixed.

- The share draft and share charge-offs description does not always appear on member's inquiry screen.
- File Maintenance History (Teller > Member Functions > Inquiry > Accounts > Maintenance History) reported that maintenance had occurred on the Skip A Payment Lifetime Count even though it had not been changed.
- When creating a form that requires signatures that is saved with **Additional Signatures Required** selected in anticipation of a member's signature, if another Teller views the forms from a PC without a scanner configured all of the signatures are marked as Complete. Additional signatures are not allowed.
- CAMS-ii Data Miner export results that contain a pair of quotation marks (" ") place data in the incorrect place in the exported .CSV file.
