To: All CBS Customers

As you are aware, CBS has been diligently working on the sunset of Internet Explorer (IE) and its many facets in CAMS-ii. Microsoft has provided Edge in IE Mode as an alternative option and CBS plans to transition to Microsoft Edge in phases.

Phase 1 will consist of migrating all customers to Edge in IE Mode to fully assess the CAMS-ii functionality in different production environments. Based on our testing, we are confident this will provide full CAMS-ii functionality. However, if you experience any issues, please contact CBS Support via the CTT system.

- Attached are the steps for configuring your workstations to use Microsoft Edge in IE Mode. CBS support will be contacting you to assist with configuring your workstations. It is a straightforward process that will only take a few minutes per workstation. This will need to be completed by May 31, 2022.

Phase 2 will be the full transition to the Microsoft Edge browser once CBS has thoroughly reviewed and examined the production results of phase 1.

Again, thanks for your continued support of CBS. Please contact me if you have any questions.

Regards,

A handwritten signature in black ink that reads 'Ken Hunt'.
